DETAILED ACTION

1. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

2. Claims 13, 64-73, 75-82, and 85 rejected under 35 U.S.C. 112, first paragraph, as based on a disclosure which is not enabling. The use of a peroxide as the bleaching agent critical or essential to the practice of the invention, but not included in the claim(s) is not enabled by the disclosure. See *In re Mayhew*, 527 F.2d 1229, 188 USPQ 356 (CCPA 1976). Applicant's remarks filed on August 30, 2006 states that the bleaching with peroxide gives the product properties that distinguished from the prior art, i.e., increased curl and porosity: see below. Yet the use of peroxide for the bleaching is not claimed:

"The features added to the product claims are not merely process limitations; rather the bleaching for example, increases fiber curl as hydrogen peroxide is consumed, reducing tensile and increasing porosity or porofil values of sheet using the fiber."

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claim 13, 64-72 and 85 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

5. The term "elevated temperature and pressure" in claims 13 and 85 is a relative term which renders the claim indefinite. The term "elevated" is not defined by the claim, the specification does not provide a standard for ascertaining the requisite degree, and one of ordinary skill in the art would not be reasonably apprised of the scope of the invention. Elevated

temperature and pressure are relative terms and the metes and bounds of patent protection desired cannot be ascertained.

Response to Arguments

6. Applicant's arguments with respect to claims 13, 64-73, 75-82, and 85 have been considered but are moot in view of the new ground(s) of rejection.

Allowable Subject Matter

7. Claims 13, 64-73, 75-82, and 85 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 1st and 2nd paragraphs, set forth in this Office action.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure in the art of "Use of Convolute Fibers."
